Dear Board of the Arizona Corporation Commission,

We are writing to oppose changes that would do away with requirements for utilities to increase energy efficiency through programs that reduce consumption. Tucson and Pima County have utilized these requirements to fund programs for trees, rebates for energy efficient appliances and lighting and more, with other programs in the planning stages.

Furthermore, changing the way utilities claim credits for renewable energy would seriously reduce the value and effectiveness of the current incentives. Arizona's sunshine puts us in the forefront of development and utilization of solar technology. Cutting incentives for these programs is short-sighted.

We urge you to leave the current energy efficiency mandates and the current regulations for utilities claiming credits for renewable energy in place as they are.

Thank you for your consideration.

Sincerely,
Carolyn Leigh and Ron Perry
